

## CURRENT LISTING OF CLAIMS

1-25 (canceled)

26 (previously presented): An improved GPS device, having a radio portion that communicates with a plurality of satellites for determining a location of the device, the improvement comprising:

- an apparatus for unlocking a door on a nearby motor vehicle;
- a capability for triggering multiple warnings at different locations, including a first trigger that activates an alarm on the motor vehicle; and a second trigger that transmits the location to a recipient at a distant location that communicates with a ground dispatch station; and
- wherein the first and second triggers are disposed within a remote control unit for a car alarm.

27 (previously presented): The device of claim 26, further comprising a connector for attachment of a key.

28 (previously presented): The device of claim 26, wherein the alarm is part of a security system of the motor vehicle.

29 (previously presented): The device of claim 28, further comprising a switch for activating the security system.

30 (previously presented): The device of claim 28, further comprising a switch for de-activating the security system.

31 (previously presented): The device of claim 26, wherein the first and second triggers comprise the same physical trigger.

32 (previously presented): The device of claim 26, further comprising a speaker that emits a sound triggered by operation of at least one of the first and second triggers.
